Backend Developer

Expense Tracker

📅 09/2024   📍 Location

- **Track Expenses**: Users can easily add, edit, and delete their daily expenses, helping them keep track of where their money goes.
  Budgeting: The app allows users to set budget limits for different categories, promoting better financial planning.
  Reports and Analytics: Users can generate reports to visualize their spending habits over time, making it easier to identify trends.
  User Security: The app includes secure login and profile management features to protect users' financial information.

PROJECT GuardianMilk: Detecting Milk Adulteration With IoT And Data Analysis

📅 01/2023 - 12/2023   📍 Location

- Food adulteration of milk is the focus of this project, where the addition of adulterants to any pure substance results in harmful changes to its content, endangering human health
- Data is processed to determine whether the product in question is acidic or basic and to quantify the extent of adulterants added
- By employing IoT and data analysis techniques, the project safeguards consumers by identifying and quantifying milk adulteration, ensuring the purity and safety of the product

App Developer

📅 01/2023 - 12/2023   📍 Location

- A mobile application designed to combat daily food wastage is available for download by any citizen
- Users can capture food images, and with a single click, the location is allocated and stored in the database
- The end result is a significant reduction in food wastage, contributing to a more sustainable approach to food resource utilisation

Software Developer

AquaLife

📅 01/2021 - 12/2021   📍 Location

- Developed the Aqualife mobile application to facilitate drinking water delivery for individuals with disabilities during COVID situations
- Enabled ordering of water cans at specific times through the mobile application
- Addressed essential requirements in the community by providing a solution for drinking water delivery during pandemic conditions

SUMMARY

- To pursue a job opportunity in a competitive environment that will challenge me to push my boundaries and expand my knowledge in the field of computer science while allowing me to add value to the dynamics of the company.

SKILLS

JAVA   NodeJS   JavaScript   MySQL

OracleSQL   MongoDB

TypeScript Basic

EDUCATION

MCA Degree

BMS Institute Of Technology And Management

📅 02/2021 - 11/2023   📍 Bangalore, India

- 8.33 CGPA

BCA Degree

Basaveshwar Science College

📅 05/2019 - 09/2021   📍 Bagalkot,India

- 77%
